

What is Laser Therapy?

A surgery-free, drug-free, noninvasive treatment to:

Reduce Pain
Reduce Inflammation
Speed Healing

Class IV Deep Tissue Laser Therapy

uses a beam of laser light to deeply **penetrate tissue** without damaging it.

Laser energy induces a biological response in the

cells called "photo-bio-modulation", which leads to **reduced pain, reduced inflammation, and increased healing speed.**

How it Works

The laser light is delivered through a noninvasive handpiece

to treat the affected area.

Your pet may feel a gentle and soothing warmth.

Most treatments take a matter of minutes.

What are the Costs?

Treatment protocols are unique to each patient and condition. Therefore, treatments will vary in

time, complexity, and cost.

Laser therapy can be used to enhance other treatment plans recommended by your veterinarian.

Laser
Therapy
has been
scientifically
proven to be
successful in
treating post-surgical
pain and many acute
and chronic conditions.

Acute Conditions

Wounds
Allergies
Infections
Cuts/Bites
